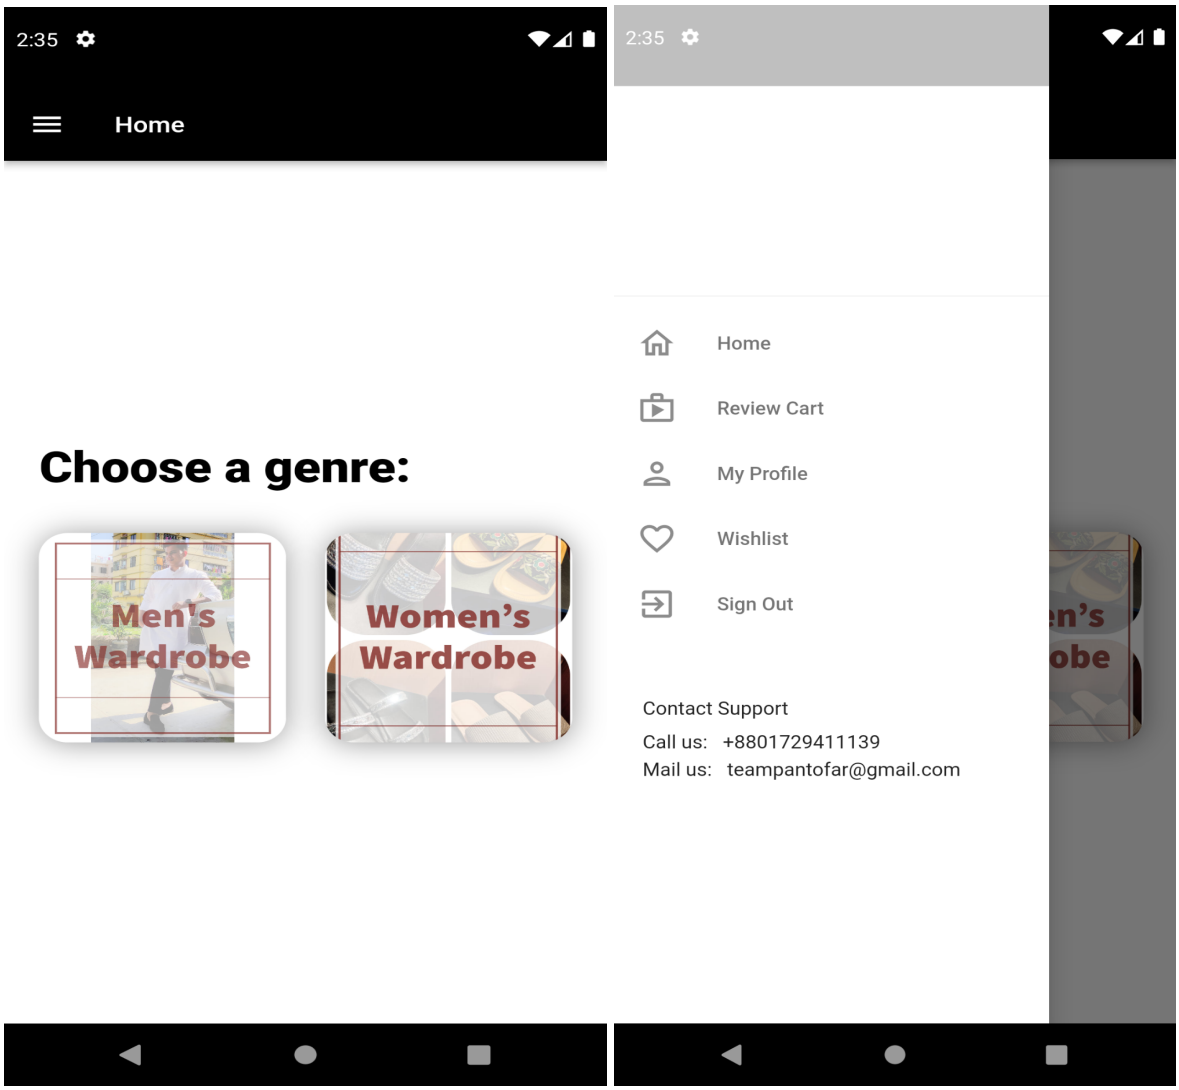
Module :	**Sign Up | Sign in**

By signing in or up with the system, listed users can access the system. For building this module Google's Log in API has been chosen.

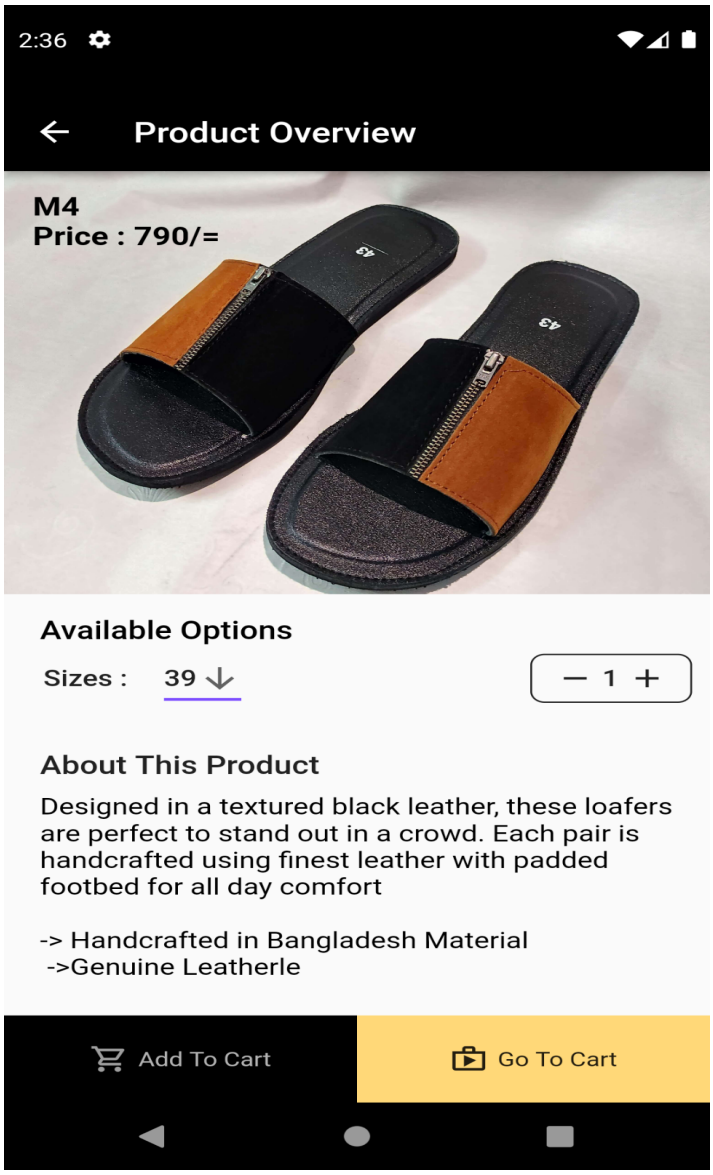


Module :	**Home**

By choosing the required gender section customer will be able to scroll the present stocked products by his/her choice.

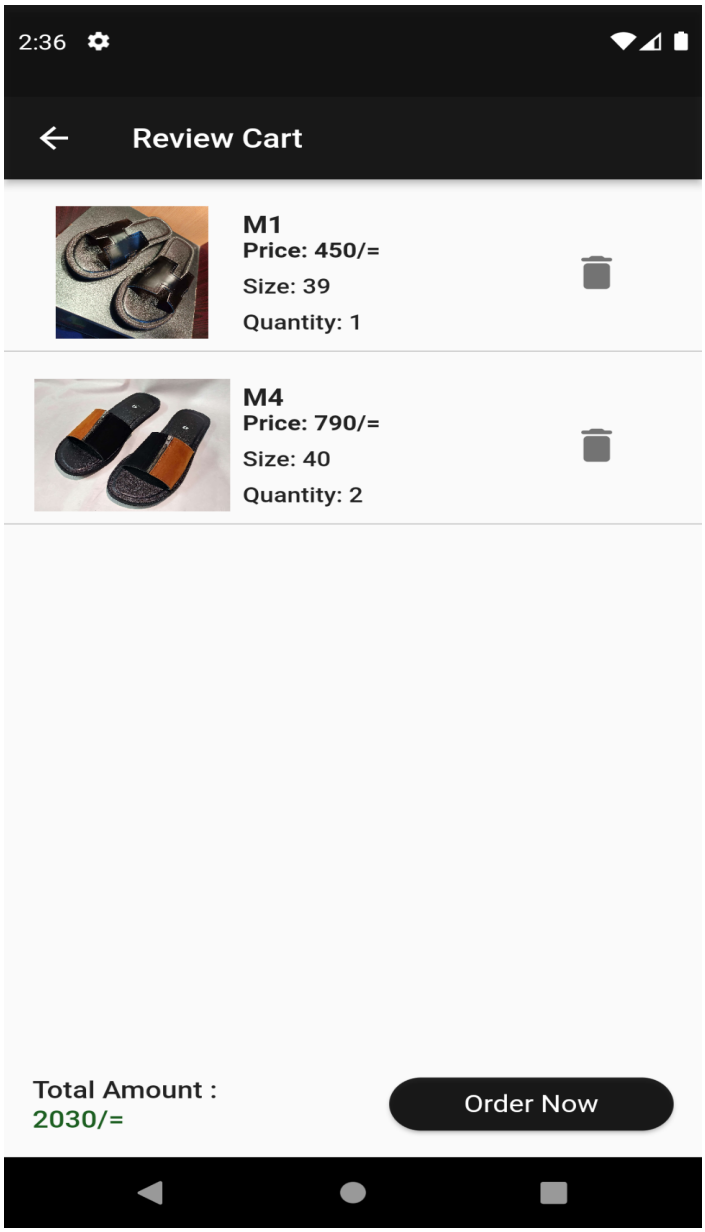
Module :	**Men's Collection | Women's Collection**

The corresponding collection of chosen genres will be shown to the user in such a view.



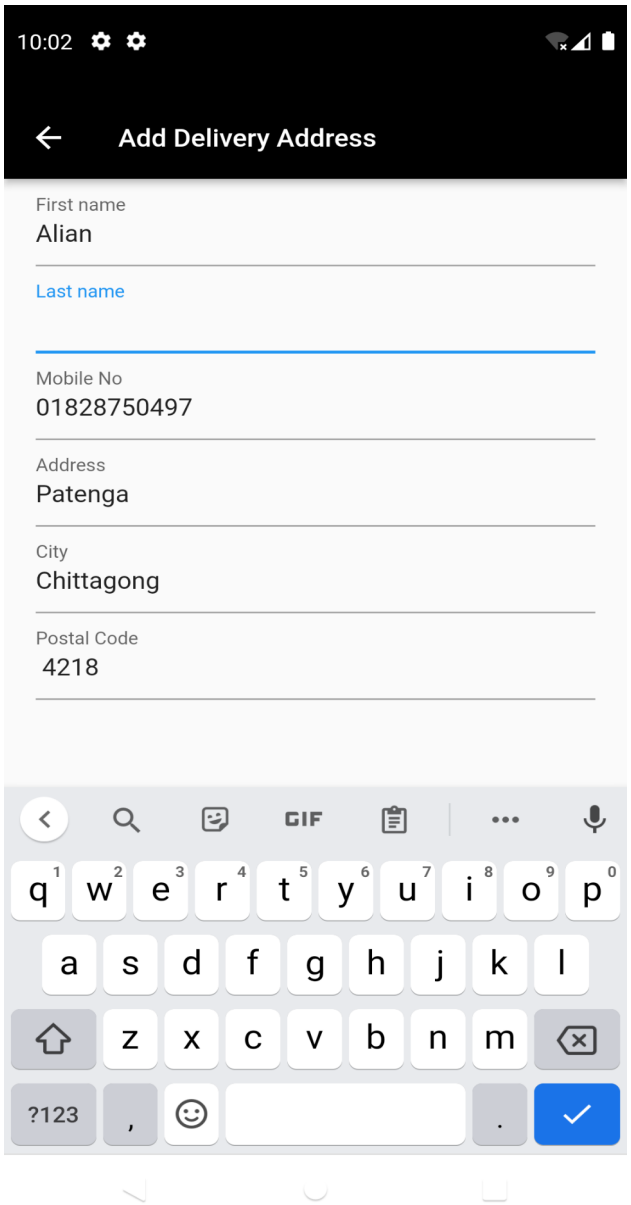
Module :	**Product Overview**

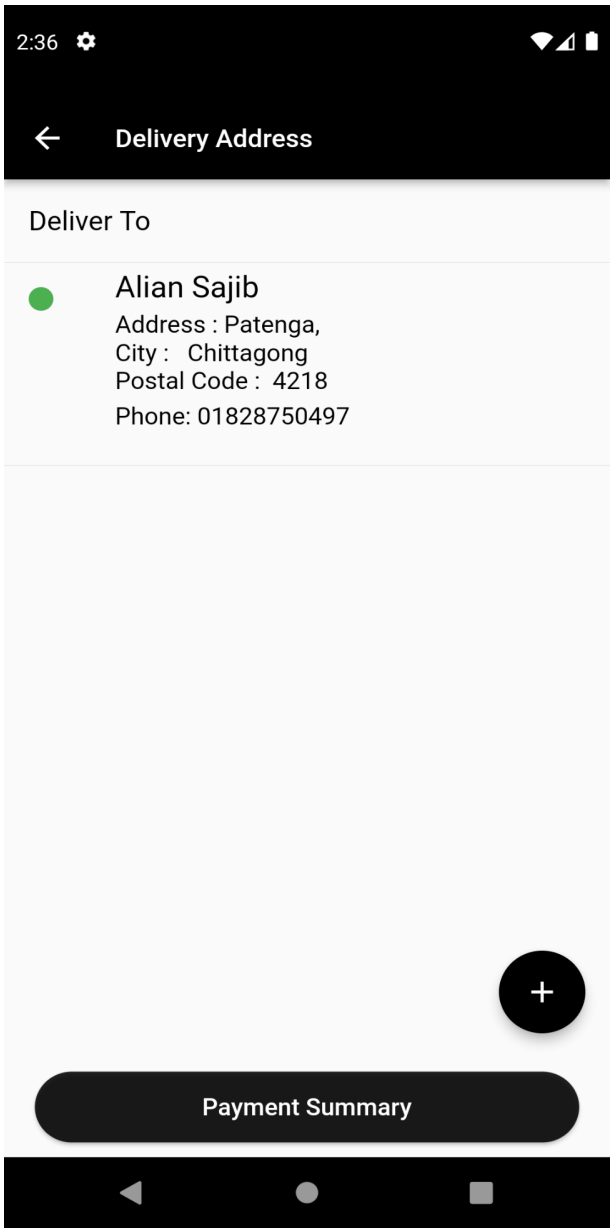
*A specific overview, corresponding to a product will be shown to the user in such a view. The **ADD TO CART** button will be adding the product to the review cart.*



Module :	**Review Cart**

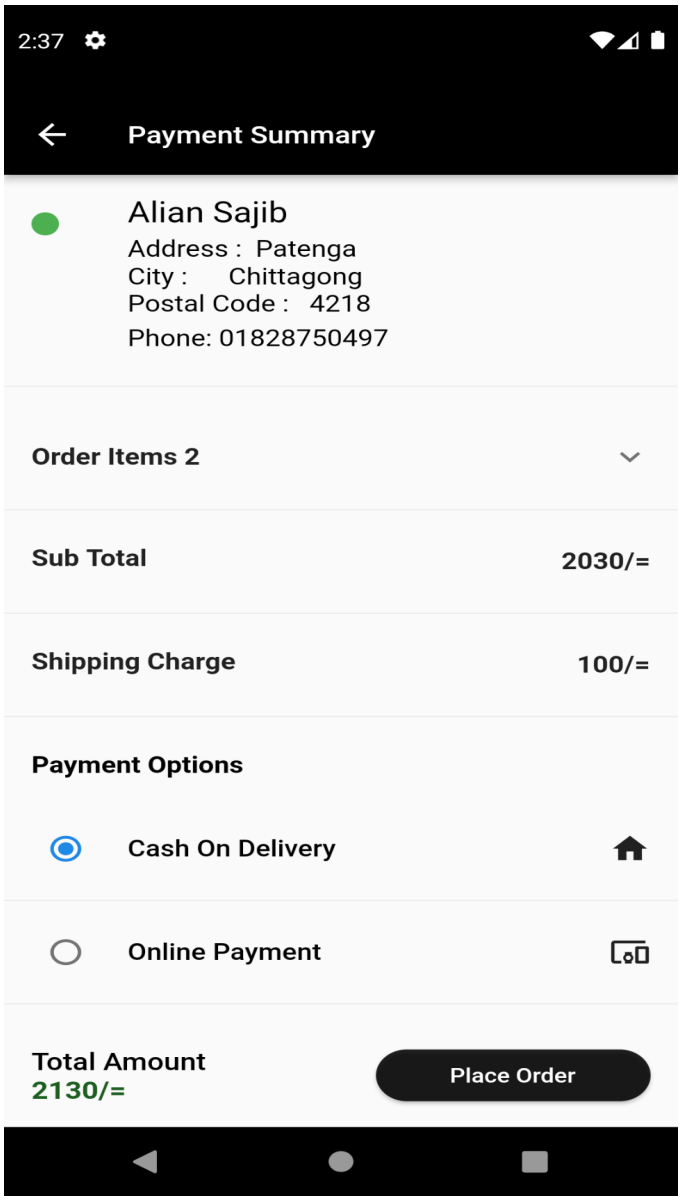
The chosen product have been added to the REVIEW CART. Each added product is deletable using the DELETE icon of each row. And the total billing is also there.





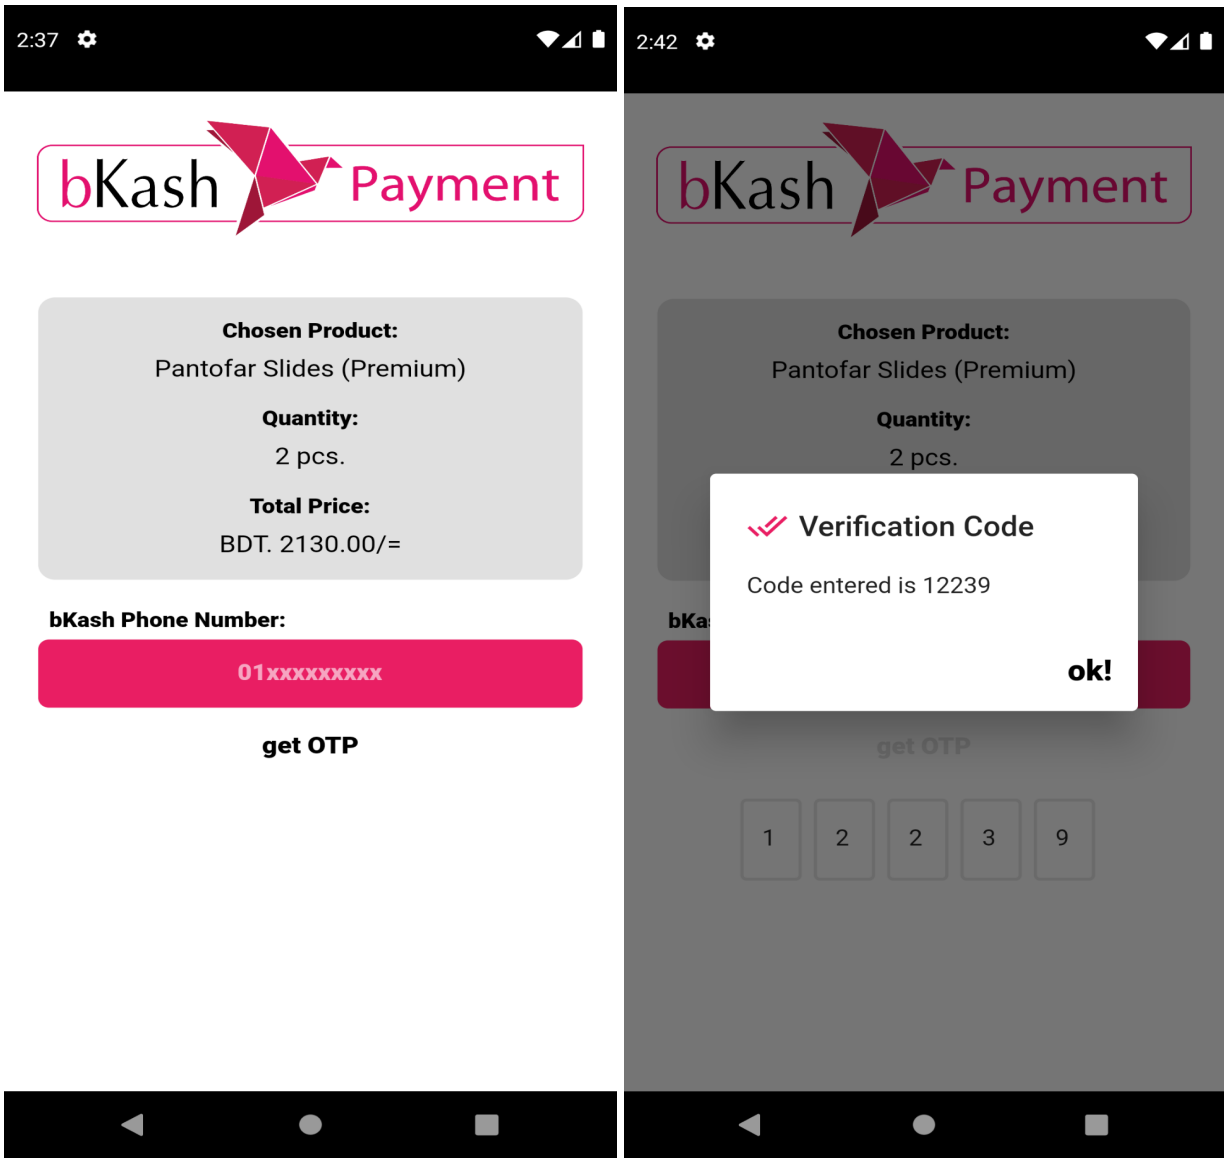
Module :	**Delivery Address**

After proceeding the order, the user needs to provide inputs of their exact location of product delivery.



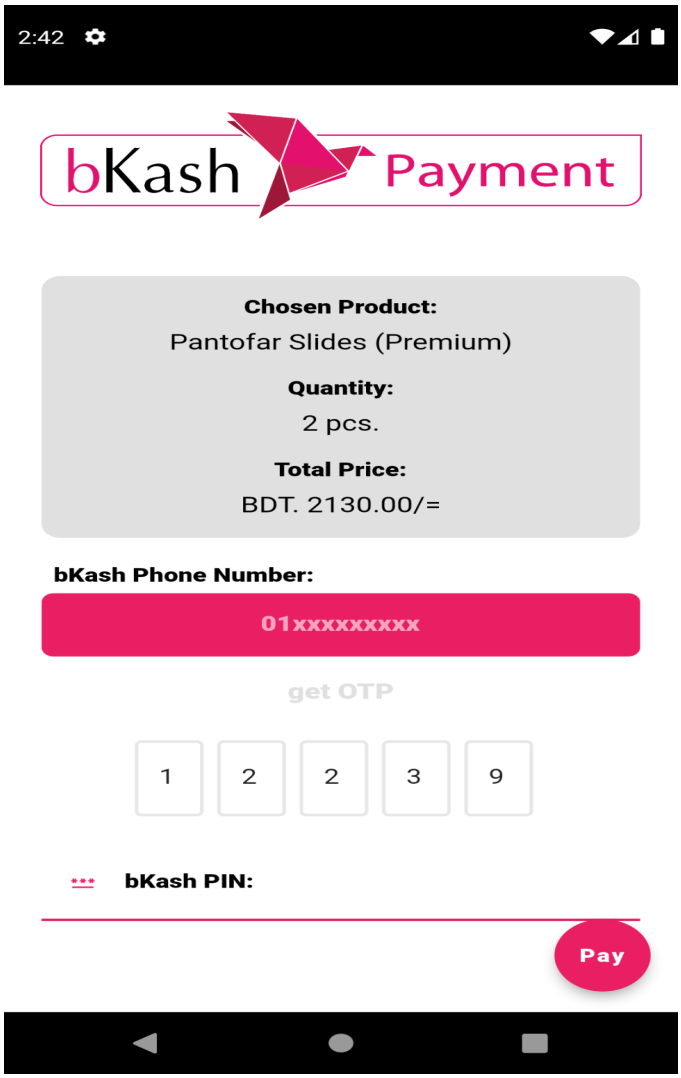
Module :	**Payment Summary**

This module mainly contains the choice of delivery types from the user. Choosing online payment takes the user to the bKash API and choosing COD takes input of confirmation about the order.



Module :	**bKash API**

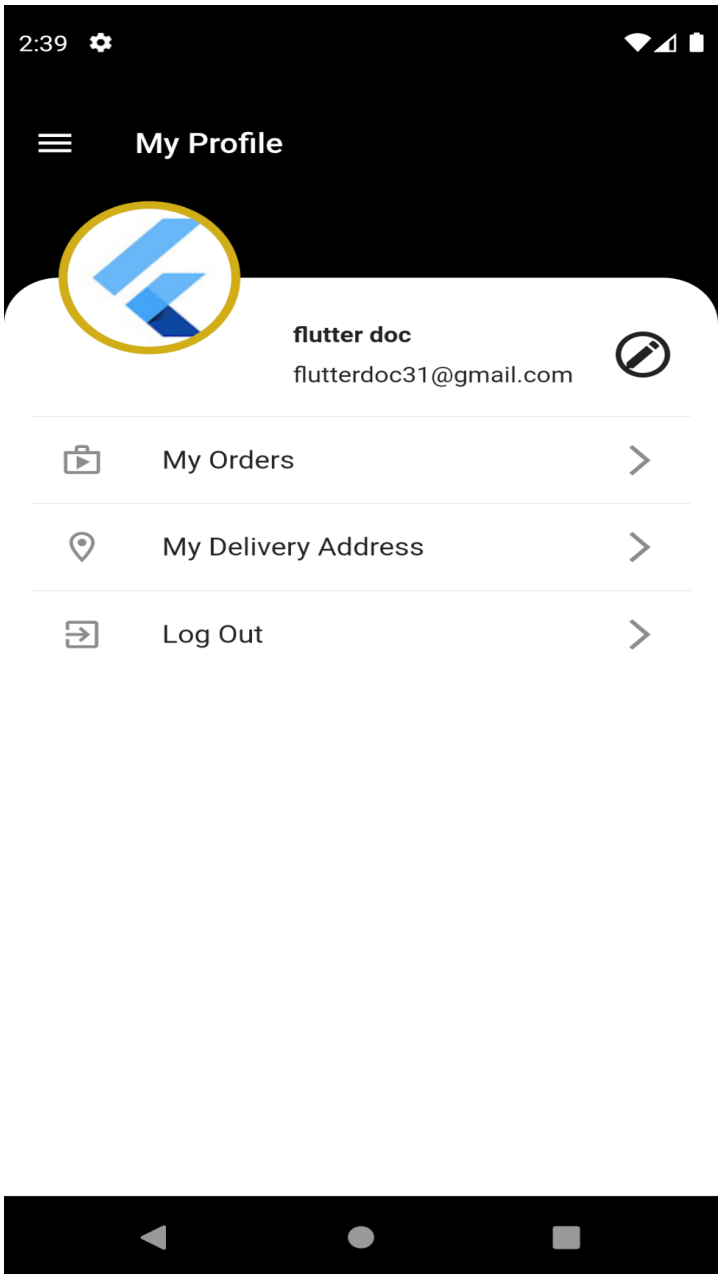
This module takes the cell no. from the customer and sends an OTP on that no. as verification. (continue)



Module :	**bKash API (continue)**

Then by putting the bKash pin the user is able to make the payment.

Happy Shopping !



Module :	**My Profile**

This module is all about the user buying history ,his/her delivery address and switching into accounts.
